1. Seat

The seats are individual regardless of the number of seats in the composition. The seat is formed by a foam that defines the shape of this, a tablex (DM of 3mm) at the base so that the shape is defined.

2. Base

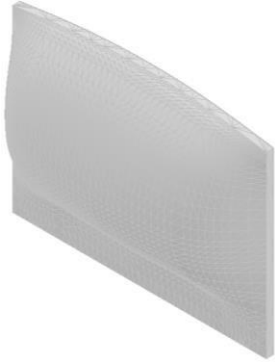

The base structure can be 1 seat, 2 or 3, in all cases it is composed of a 22mm DM structure upholstered with the same fabric as the seat.

This upholstered base is fixed by screws to an iron structure painted in black, with black PE edges so as not to damage the floor.

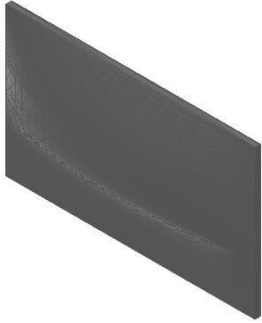

3. Backrest

The backrest is composed of a 10mm DM. On the DM, a foam is placed covering it on both sides, and on this it is upholstered with the fabrics detailed below.

4. Arms

The arm has the same mounting system and materials as the backrest.
